DEFINITION OF TERMS

Market Share: The dollar amount of direct premiums written by company divided by the total amount of direct premiums written industry-wide for the particular line of business being analyzed, expressed as a percentage.

Direct Premiums Written: The dollar amount charged when a policyholder contracts for insurance coverage before reinsurance has been ceded and/or assumed.

Direct Premiums Earned: The part of premium attributable to the coverage already provided in a given period before reinsurance has been ceded and/or assumed.

Direct Losses Paid: The sum of all payments made during the year for the benefit of insurance claimants, before reinsurance has been ceded and/or assumed. These payments include amounts paid in the current year for claims arising from coverage in prior years and exclude amounts which will be paid in future years for claims arising from the current year. Hence, this item is not a measure of the actual cost of current coverages, but only of current cash flows.

Direct Losses Incurred: The sum of direct losses paid plus an estimate at the close of the year of the amounts to be paid in the future for all claims arising from the current and all prior years, minus the corresponding estimate made at the close of business for the preceding year. Incurred losses reported include estimated amounts unpaid for incurred-but-not-reported (IBNR) claims.

Loss Ratio: The dollar amount of direct losses incurred divided by the dollar amount of premiums earned for the particular line of business being analyzed, expressed as a percentage. This is an accounting representation of the portion of each premium dollar which is needed to honor a company's promise to pay claims.

Cash Flow Loss Ratio: The dollar amount of direct losses paid divided by the dollar amount of premiums written for a particular line of business being analyzed, expressed as a percentage.
